

Application No.: 10/727,292

Docket No.: JCLA12308-R

In the Claims:

Please amend the claims as follows:

Claim 1. (currently amended) A method for producing a soluble composition containing ~~soluble~~ isoflavones, comprising:

preparing, without a protease treatment and without addition of solubilizing agents, a soybean extract liquid that has a pH value adjusted to 5.5-7 and a temperature adjusted to 0-17°C, wherein the soybean extract liquid is obtained from a soybean material without a physical treatment; and

removing insoluble materials from the soybean extract liquid.

Claim 2. (original) The method of claim 1, wherein an amount of isoflavones is 0.2-20wt%, a crude protein content is 30wt% or less, and a lipid content is 4wt% or less in total solid content of the soybean extract liquid.

Claims 3-6: (canceled)

Claim 7. (currently amended) The method of claim 1, wherein ~~the soybean extract liquid is obtained from~~ the soybean material comprises soybean hypocotyls.

Claim 8. (currently amended) The method of claim 2, wherein ~~the soybean extract liquid is obtained from~~ the soybean material comprises soybean hypocotyls.

Claims 9-10: (canceled)

Claim 11. (previously presented) The method of claim 1, after removing insoluble materials from the soybean extract liquid, further freeze-drying the soybean extract liquid to obtain a solid composition containing soluble isoflavones.
